

Improve your packaging process!

Mix 2-8 Products

NO.	DESCRIPTION	FUNCTION
A	Vibratory Feeder	Evenly feed bulk materials to downstream units
B	Z Bucket Elevator	Vertically lift the bulk material to the scale feed hoppers by bucket moving
C	24-head Scale #1	Auto weighing each materials and combine dump to the downstream units
D	24-head Scale #2	Auto weighing each materials and combine dump to the downstream units
E	Working Platform	Use to support the scale and do daily operation
F	Rotary Pouch Machine	Auto finish processing of packages: pick up - open - fill - seal - output

NO.	DESCRIPTION	FUNCTION
A	Bucket Elevator	Lifting bulk materials to Multhead Weigher
B	Multthead Weigher	Auto dose/fill portion materials as preset
C	Working Platform	Support Weight Filler & daily maintenance
D	Bottle Unscrambler	Tidy up and feed empty bottles to Indexing Belt
E	Filling Device	Transit hopper between weigher and Index belt
F	Indexing Conveyor	Transport empty bottles to filling devices
G	Caps Feeder	Auto feeding caps the filled bottles
H	Capping Machine	Auto rotate to close caps by screwing
I	Accumulation Table	Collect finished bottles from upstream unit

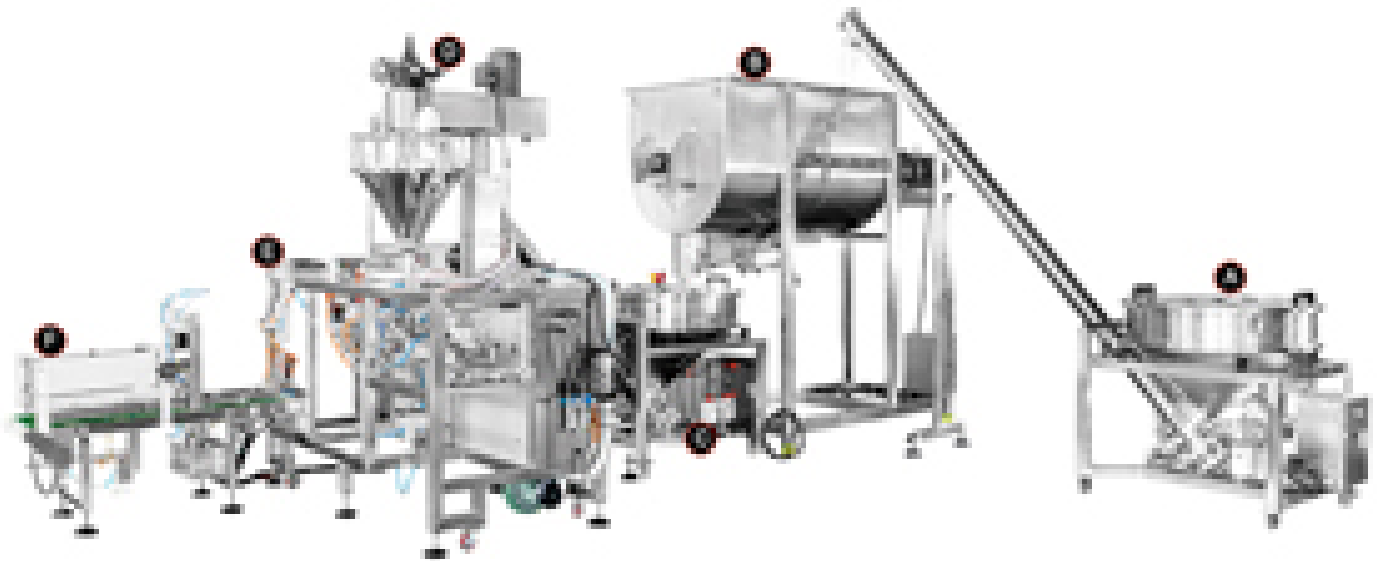

NO.	DESCRIPTION	FUNCTION
A	Fastback Feeder	Feeding bulk potato chips evenly & gently
B	Checking Conveyor	Manually checking good/bad potato chips
C	Belt Conveyor	Conveying bulk chips to vibratory feeder
D	Vibratory Feeder	Auto feeding bulk chips to flavour drum
E	Flavour Drum	Auto mixing both chips and flavour
F	Belt Conveyor	Convey chips with flavour to Multihead weigher
G	Loss-in-weight	Feeding flavour as preset weight
H	Multihead Weigher	Auto dose/fill portion materials as preset
I	Working Platform	Support Weight Filler & daily maintenance
J	Doypack Machine	Auto pickup pouch - open - fill - seal - output
K	Output Conveyor	Take off the finished packs to next unit
L	Accumulation Table	Collect finished bottles from upstream unit

NO.	DESCRIPTION	FUNCTION
A	Pouches Loader	Auto feeding empty pouch for machine to take
B	Bucket Elevator	Lifting bulk materials to Weight Filler
C	Linear Weight Filler	Auto dose/fill materials as per preset
D	Working Platform	Support Weight Filler & daily maintenance
E	Pouch Machine	Auto pickup pouch - open - fill - seal (Optional)
F	Stitching Machine	Auto sewing filled woven bags
G	Output Conveyor	Take off / Output finished packs

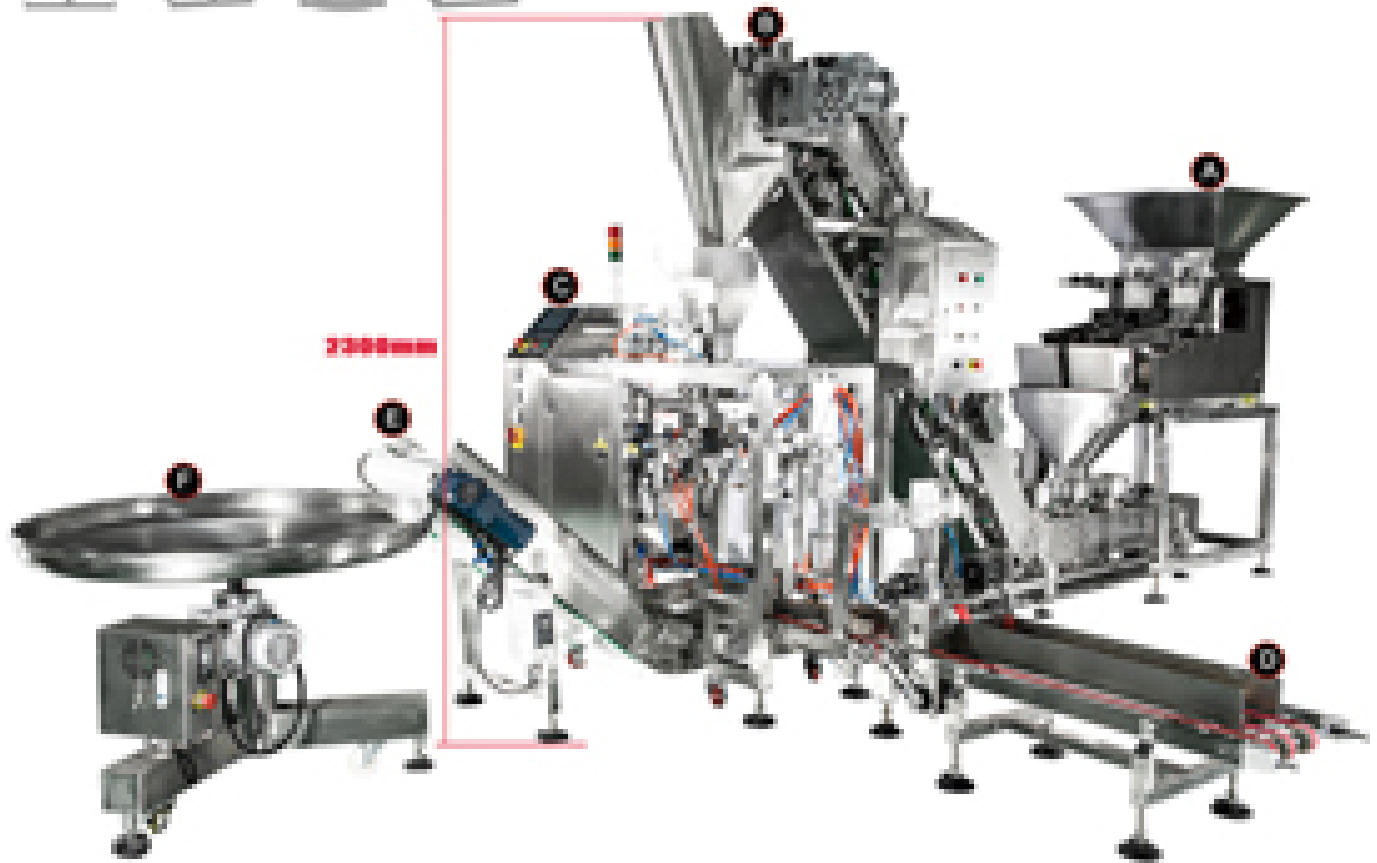

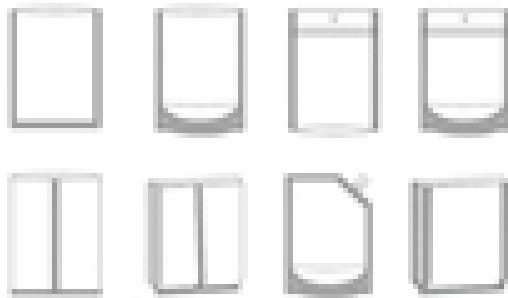

NO.	DESCRIPTION	FUNCTION
A	Bucket Elevator	Lifting bulk materials to Weight Filler
B	Weight Filler	Auto dose/fill materials as per preset to next downstream
C	Working Platform	Support Weight Filler & daily maintenance
D	Doypack Machine	Auto finish preformed pouches pick up - open - fill - vacuum - seal
E	Belt Conveyor	Move out the filled-vacuumed-sealed Packages
F	Carton Feeder	Feed empty cartons for Erector to take
G	Carton Erector	Auto carton suction, forming, flaps folding, and bottom tape sealing all in one
H	Carton Sealer	Auto close cartons with self-adhesive tapes
I	Roller Conveyor	Take off the finished cartons

NO.	DESCRIPTION	FUNCTION
A	Screw Conveyor	Feeding bulk powder to ribbon mixer
B	Ribbon Mixer	Auto mixing powder and fill into screw conveyor
C	Screw Conveyor	Feeding mixed powder to auger filler
D	Auger Filler	Auto filling mixed powder as per preset value
E	Doypack Machine	Auto pickup pouches - open - fill - seal - output
F	Auto Pouches Feeder	Put a pile of pouches for machine to take

NO.	DESCRIPTION	FUNCTION
A	Bucket Elevator	Lifting bulk materials to Weight Filler
B	3L & Head Weigher	Auto dose/fill material portion as preset
C	Working Platform	Support Weight Filler & daily maintenance
D	Doypack Machine	Auto pouches pick up - open - fill-seal function
E	Auto Pouches Feeder	Load a big pile of pouches for machine to take
F	Output Conveyor	Output finished packs to next unit
G	Metal Detector	Inspect if the package contains any metals or stainless steel
H	Weight Checker	Online dynamic check if the packages over or less than acceptable weights
I	Air-pusher Rejector	Retrieve the rejected package over/less weight or with metal parts

NO.	DESCRIPTION	FUNCTION
A	Triplex Linear Weigher	Auto weighing and filling products to each bowl on elevator
B	Bowl Type Elevator	Lift the portion material to the packing machine by each bucket constantly
C	Doypack Machine	Auto finish processing of packages: pick up - open - fill - seal - output
D	Auto Pouch Feeder	Put a big pile of bags for machine to take
E	Output Conveyor	Take off the finished packs to next units
F	Accumulation Table	Collect finished pouches from upstream unit

NO.	DESCRIPTION	FUNCTION
A	Inclined Elevator	Auto lifting bulk materials on the weigher
B	Multihead Salad Weigher	Auto filling material as per preset set
C	Working Platform	Support the weigher and daily maintenance
D	VFFS Machine	Auto finish plastic film pull-form-fill-seal -output
E	Output Conveyor	Take off the finished packs to next units
F	Weight Checker	Auto check if pack is out of accept weight
